

Automation & Growth Proposal

TSM Collision — Temecula, CA

Prepared for Efrain Vasquez, TSM Collision · Prepared by Leo Lebel, Circuit Coders · Date June 19, 2026

Executive Summary

TSM Collision is a genuinely excellent shop — clean paint work, real attention to detail, and customers who praise your communication and honesty. That reputation, though, mostly lives in your customers' heads and not where new customers look. Today every new job has to come through one channel — the phone, during business hours — and the shop's online presence (reviews, search visibility, lead capture) is doing almost none of the selling it could be doing.

This proposal lays out three options, smallest to largest. Each one is scoped honestly: we describe what we **do** and what we **capture**, not outcomes we can't control. You can start at any tier and move up later.

1 What We Found

1. The phone is the only door in — and it closes at 5

Every job starts with a phone call, and the shop is open Monday–Friday 8–5, closed weekends. A fender-bender doesn't keep business hours. Tonight's and this weekend's callers reach voicemail — and a voicemail competing with a shop that picks up usually loses the job.

2. Your reputation is nearly invisible online

For a shop this well-regarded, the public review footprint is thin — a small handful of reviews across Yelp and Google. A competing shop on the same street has dozens of Yelp reviews. New customers comparing shops see *their* wall of reviews and your near-empty one. The work is better; the scoreboard says otherwise.

Exact review counts should be confirmed live before signing — review platforms change daily.

3. The website can't capture or convert

- **No online booking or estimate-request form** — every call-to-action is a "call us" phone link. There's no way for a customer to request an estimate or appointment online, day or night.
- **No live chat** to catch the visitor who won't pick up the phone.
- **Weak local-search structured data** — the site (built on Wix) carries only a bare-bones "WebSite" schema tag, with no *LocalBusiness* markup for your address, hours, or service area. That structured data is exactly what Google reads to rank you in the local map pack and "near me" results.
- **No paid acquisition** — collision is high-intent, high-value work, and there's no sign of paid search while competitors can bid on your customers.

What's already working (and stays): the existing site is clean and mobile-friendly, with solid on-page basics already in place — a clear title, meta description, hours, and social links. Your CCC ONE shop system is the industry standard, and your repair quality and word-of-mouth are genuinely strong. We are building on a good foundation, not replacing one.

2 The Three Options

How to read the price: these are *done-for-you* managed services — built for your shop, integrated with CCC ONE, and run for you month to month — not a do-it-yourself app you configure and babysit. For perspective: a full-time front-desk receptionist runs **\$3,000–\$4,500/mo**, and a single missed collision job is **\$2,000–\$6,000** in lost work. Recovering even one extra job a month covers the service several times over.

OPTION 1 — ENTRY

AI Phone Receptionist

An AI voice assistant answers the phone 24/7. It greets callers, answers common questions (hours, location, "do you handle insurance?", "do you do paintless dent repair?"), collects the caller's name, vehicle, and damage details, and books an *estimate request* on your calendar. After hours, it texts the lead straight to you so nothing waits until morning. Bilingual English/Spanish. Every call logged.

***What it honestly does:** it makes sure every call is answered and every lead is captured. It does not give repair prices (a collision estimate requires seeing the car) and it won't catch the rare caller who hangs up on an automated voice — a human still confirms each appointment.*

Setup **\$1,500** · Base **\$349/mo** + **\$0.25/min** talk time

*Call minutes are metered and billed monthly on actual usage at \$0.25/min — for a shop your size that typically runs about \$75–250/mo on top of the base, scaling only with the calls the system actually handles for you. **Support included: Monday–Friday, 9–5.***

OPTION 2 — RECOMMENDED

Full Shop Automation

Everything in Option 1, plus the rest of the front-office workflow:

- **Automated repair-status texts** — customers get a text at each stage of their repair. We configure CCC ONE's built-in texting where it fits, and layer our own on top off a one-tap front-desk update or a direct CCC Secure Share connection (see Section 3).
- **Review-request engine** — every completed job automatically gets a polite text asking for a Google/Yelp review. We send the request every time; review volume typically climbs steadily as a result.
- **Online estimate / booking form** added to the site, routed to the bot and your calendar.
- **Lead follow-up** — anyone who got a quote and didn't book gets an automatic, friendly nudge.
- **Monthly dashboard** — calls answered, leads captured, jobs booked, reviews requested vs. earned.

***What it honestly does:** we automate the request and the workflow. We can't guarantee a specific number of reviews or bookings — but every customer gets asked, every lead gets followed up, and you'll see the real numbers each month. CCC deep-integration depends on CCC's approval; the status-text system works day one regardless.*

Setup **\$3,500** · Base **\$1,500/mo** + **\$0.25/min** talk time

*Includes the AI phone receptionist, so the same metered call billing applies — \$0.25/min on actual usage (typically ~\$75–250/mo for a shop your size). **Support included: Monday–Friday, 9–5.***

OPTION 3 — FULL GROWTH PARTNER

Everything + Website, SEO, Ads & On-Site AI

Everything in Options 1 and 2, plus we run the whole digital front end:

- **Website rebuild** — fast, conversion-focused, online booking built in.
- **Local SEO & brand scaling** — Google Business Profile optimization, local landing pages, ongoing content to compete for Temecula-area searches.
- **Paid ads** — Google & Meta local campaigns on high-intent collision searches, managed and optimized monthly.
- **On-site AI chat agent** — answers questions and captures leads 24/7 on the website.
- Monthly strategy + reporting on the full funnel: search → call → booked job.

What it honestly does: we do the work and report real numbers. SEO and ad results build over roughly 3–6 months — we control the inputs and the spend efficiency, not Google's rankings or a guaranteed return. The goal is to make TSM the top-ranked, most-reviewed shop in the valley; we won't promise a ranking we can't command.

Setup **\$6,500** · Base **\$2,950/mo** + **\$0.25/min** talk time

*Includes the AI phone receptionist, so metered call billing applies at \$0.25/min on actual usage (typically ~\$75–250/mo). Ad spend is billed separately at cost (recommended \$1,000–\$2,000/mo to start). No money-down on ad spend or usage you haven't approved. **Support included: Monday–Friday, 9–5.***

3 How This Connects to Your CCC ONE

CCC ONE is the hub your shop already runs on. We build *around* it — nothing gets ripped out or replaced.

What CCC ONE already does — we configure it, we don't rebuild it

CCC ONE includes built-in automated status texts that keep customers updated through a repair. Where that's the right fit, we simply turn it on and tune the messaging — you should never pay us to rebuild a feature you already own.

What we integrate, with your authorization (via CCC Secure Share)

CCC's **Secure Share** network is a secure cloud API (JSON/REST, the industry-standard CIECA BMS format) that lets an approved app read your job data. With your sign-off, we connect to it so that:

- When a repair reaches **Final Bill** (job complete), that's the automatic trigger for the review-request text and any follow-up — no one at the front desk has to remember.
- Customer and vehicle details flow in to personalize every message we send.

Secure Share access requires CCC's standard app-developer approval and carries a small per-job data fee — we handle both. Until that connection is live, every one of these automations runs off a one-tap "job done" at the front desk, so nothing waits on the approval process.

What lives outside CCC — this is what we build

CCC ONE only knows about jobs already written up. Everything *upstream* of that — the missed call, the tire-kicker, the after-hours lead — is invisible to it, and that's exactly where the lost revenue is. We build the layer CCC doesn't cover:

- The **AI phone receptionist** and online booking form (capture the lead before it's ever a CCC job).
- The **review-request engine** and **lead follow-up** for callers who never became a workfile.
- Your **reporting dashboard**, tying calls, leads, jobs, and reviews together in one view.

4 How We Work

Month-to-month after setup — no long lock-in. We start with a short access & onboarding call, stand up the system, and you see results in your dashboard. If a tier isn't pulling its weight, you can step down or out. We'd rather keep you because it works than because of a contract.

5 Agreement & Acceptance

To move forward, check the option you'd like to begin with, then sign below. This is a simple month-to-month service agreement — the setup fee is due on signing, the monthly base begins when your system goes live, and metered call usage (where applicable) is billed in arrears on actual minutes.

SELECT	OPTION	INVESTMENT
☐	Option 1 — AI Phone Receptionist	\$1,500 setup · \$349/mo + \$0.25/min
☐	Option 2 — Full Shop Automation (Recommended)	\$3,500 setup · \$1,500/mo + \$0.25/min
☐	Option 3 — Full Growth Partner	\$6,500 setup · \$2,950/mo + \$0.25/min + ad spend at cost

- **Term:** Month-to-month. Either party may cancel with 30 days' written notice. No long-term lock-in.
- **Setup fee:** Due on signing; covers build, configuration, and CCC ONE integration setup for the selected option.
- **Monthly base:** Begins on go-live date and is billed on the 1st of each month.
- **Support:** Included on every tier — Monday through Friday, 9–5.
- **Call usage:** Metered at \$0.25/min and billed monthly on actual minutes handled. A monthly usage alert can be set on request.
- **Ad spend (Option 3):** Billed separately at cost; nothing is spent without your written approval.
- **Authorizations:** Client authorizes Circuit Coders to access the accounts needed to deliver the selected services (e.g. CCC ONE / Secure Share, Google Business Profile, website, ad accounts).
