

CUSTOM WEBSITE PROPOSAL

SEMPER FI SPORTS CAVE

A custom website + AI-powered card inventory system — already built and live.

Prepared for **the owner, Semper Fi Sports Cave** · 131 W Beech St, Suite 102, Fallbrook, CA 92028

Prepared by **Circuit Coders** · Leo Lebel · cheddar.lebel@gmail.com · June 16, 2026

★ SEE IT LIVE RIGHT NOW

fallbrook-sports.vercel.app

Open it on your phone during our meeting — your real shop, your logo, your inventory, live pricing.

01 THE OPPORTUNITY

Semper Fi Sports Cave has built something most shops never do: a **4.6-star reputation across real Google reviews** and a loyal local following in Fallbrook — minutes from Camp Pendleton. Customers already love the shop. There's just one gap holding it back online:

Your Google listing has no website attached. When someone searches "card shop near me" or finds you on Google Maps, there's nowhere for them to go — no way to browse your inventory, check today's hours, or see what just came in. Every one of those clicks is a customer you're paying nothing to reach, and currently can't capture.

The trading-card hobby runs on discovery. Buyers want to see the cards, trust the price, and know you're open before they drive over. A fast, professional website does all three — and it's the single highest-leverage thing the shop can add online.

02 WHAT WE'VE ALREADY BUILT FOR YOU

Rather than pitch you on what we *could* build, we built it. Your website is finished and live today — pull it up on your phone and look around. Here's what's in it:

A real brand, not a template

- USMC scarlet & gold identity built around your **actual Semper Fi shield logo** — clean, premium, and unmistakably yours.
- Mobile-first: looks sharp on the phones your customers actually use, fast-loading and modern.

An AI-powered card scanner & inventory system — *the part nobody else has*

- **Snap a photo of any card** and the AI identifies it automatically — name, set, number, and category.
- It pulls the card's **live market price** straight from TCGPlayer (raw cards) and eBay sold comps (graded slabs), so your prices are always fair-market and current.
- Graded slabs get a **PSA / CGC / BGS cert-verification link** buyers can click to confirm authenticity.
- A private admin dashboard lets you add, edit, feature, price, and remove cards in seconds — no tech skills needed.

A shopping experience built for collectors

- A live "what's in the vault now" counter and category breakdown on the homepage that updates as you add stock.
- Pro-grade **filtered search**: shoppers narrow by grade (PSA 10, PSA 9, BGS, CGC, raw), era, and price bracket.
- A hover **magnifier loupe** so buyers can inspect high-end slabs in detail — exactly what they need before spending real money.
- "Live market value" badges that reframe every price as a fair-market quote, not a markup. Instant trust.

The basics, done right

- Your **verified store hours** with a live "Open Now / Closed" badge, plus a "follow our Instagram for holiday hours" prompt.
- Click-to-call phone, one-tap directions, and direct links to your Instagram, Facebook, and X.
- Built for Google: fast, search-friendly, and ready to be the website on your Google listing.

03 THE OFFER

One simple package — the complete, live site you're looking at, made yours and kept running:

LAUNCH + CARE

\$500 to launch + **\$30**/month

A one-time \$500 to launch the site on your own domain, then \$30/month to keep it live, current, and worry-free.
First 30 days of Care included.

THE \$500 LAUNCH GETS YOU

- The complete site, already built
- Your brand & real Semper Fi logo
- AI card scanner + live market pricing
- Inventory admin dashboard
- Graded slabs + cert verification links
- Filtered collector search & loupe zoom
- Custom domain + email forwarding
- Hands-on training for you & staff

THE \$30/MONTH KEEPS IT RUNNING

- Hosting, SSL & security
- Live TCGPlayer / eBay pricing feeds
- Automatic backups
- Unlimited small content updates
- Software & performance updates
- Priority support — text or email

Month-to-month — no long-term contract. Stay because it's working, not because you're locked in. Want to sell cards online down the road? We can add full checkout later.

For perspective: a custom site with an AI card scanner and live pricing typically runs several thousand dollars to build from an agency. Because yours is already built, the launch is \$500.

04 LAUNCH PLAN

- 1 Approve & kick off.** We collect the one-time \$500 to begin. (You've already seen the finished product.)
 - 2 Custom domain.** We register and connect a clean web address (e.g., semperfisportscave.com) with email forwarding — included.
 - 3 Go live + Google.** We launch on your domain and, once you give us the go-ahead, add the website to your Google Business Profile so searchers land straight on it.
 - 4 Hands-on training.** A short walkthrough so you and your staff can scan cards and manage inventory with confidence.
 - 5 Ongoing.** The Care Plan keeps everything running; we're a text away for changes.
-

Typical turnaround from approval to live on your own domain: 3–5 business days.

05 WHY CIRCUIT CODERS

- **You've seen the work before you pay.** The site is real and live — no mockups, no guesswork.
- **Local & responsive.** You deal directly with the person who builds and maintains the site, not a call center.
- **Built for your business.** The AI scanner and live pricing were made specifically for a card shop — this isn't a generic web template.

Ready to make it yours

Agreed: **\$500 to launch** + **\$30/month** Care Plan *(first 30 days included · month-to-month)*
